RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I Claims 1-8, drawn to DNA, host cell, classified in class 536, subclass 23.7.

Further election of invention required.

II. Claims 9-10 and 13 drawn to ~~polypeptide~~ *p28 surface protein* and a vaccine composition classified in class 530, subclass 350. Further election of invention required.

III Claims 11-12 drawn to an antibody classified in class 530, subclass 388.6

Further election of invention required.

2. The inventions are distinct, each from the other because of the following reasons:

Group I is directed to DNA, which consists of nucleic acids. Groups II is directed polypeptides, which are made of amino acids; Invention III is drawn to an antibody and is distinct from Inventions I-II since it has an inherent affinity, avidity, and specificity that DNA or a simple protein is not capable of expressing. These products are different to each other structurally, biochemically and functionally.

Election of Invention

3. Although there are no provisions under the section for "Relation of Inventions" in MPEP 806.05 for inventive groups that are directed to different products; restriction is deemed proper because these products appear to constitute patentably distinct inventions for the following reasons.

Groups I-III contain claims reciting a Markush group containing a plurality of disclosed patentably distinct and different inventions with distinct SEQ.ID.NOS: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10,

Art Unit: 1645

11, 12, 13, 20 and 21. Applicant is required under 35 U.S.C. 121 to elect a single disclosed SEQ.ID.NO with specific nucleic acid or amino acid sequence.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their separate classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Padmavathi v Baskar whose telephone number is (703) 308-8886. The examiner can normally be reached on M-F (6:30A.M-4: 00 P.M.) First Friday off.
